

Weather Observation Station 3

Problem Statement

Given a table STATION that holds data for five fields namely ID, CITY, STATE, NORTHERN LATITUDE and WESTERN LONGITUDE.

+-----+	
Field	Type
+-----+	
ID	INTEGER
CITY	VARCHAR(21)
STATE	VARCHAR(2)
LAT_N	NUMERIC
LONG_W	NUMERIC
+-----+	

Write a query to print the list of CITY for even *ID* only. *You can print in any order. Do not print duplicates.*
