

# Text Alignment

## Problem Statement

In python, a string of text can be aligned *left*, *right* and *center*.

### **.ljust(width)**

Returns left aligned string of length *width*.

```
>>> width = 20
>>> print 'HackerRank'.ljust(width, '-')
HackerRank-----
```

### **.center(width)**

Returns centered string of length *width*.

```
>>> width = 20
>>> print 'HackerRank'.center(width, '-')
-----HackerRank-----
```

### **.rjust(width)**

Returns right aligned string of length *width*.

```
>>> width = 20
>>> print 'HackerRank'.rjust(width, '-')
-----HackerRank
```

## Task

You are given a partial code, used for generating *HackerRank Logo* of variable *thickness*. Your task is to replace the blank (        ) with *rjust*, *ljust* or *center*.

## Input Format

Single line containing, the *thickness* value of logo.

## Constraints

Thickness must be an *odd* number.

$$0 < thickness < 50$$

## Output Format

Output the desired logo.

## Sample Input

```
5
```

[illegible]
