

# Select by ID

## Problem Statement

Given a *City* table, whose fields are described as

+-----+-----+	
Field	Type
+-----+-----+	
ID	int(11)
Name	char(35)
CountryCode	char(3)
District	char(20)
Population	int(11)
+-----+-----+	

you have to print all the details of the city with *ID* is 1661.
