

Weather Observation Station 1

Problem Statement

Given a table *STATION* that holds data for five fields namely *ID*, *CITY*, *STATE*, *NORTHERN LATITUDE* and *WESTERN LONGITUDE*.

+-----+-----+	
Field	Type
+-----+-----+	
ID	INTEGER
CITY	VARCHAR(21)
STATE	VARCHAR(2)
LAT_N	NUMERIC
LONG_W	NUMERIC
+-----+-----+	

Write a query to print the list of *CITY* and *STATE* in alphabetical order of city and state, i.e., if there are two or more cities with same name, arrange these by alphabetical order of state.
