

Welcome to Java!

Problem Statement

Welcome to the world of Java! Just print "Hello World." and "Hello Java." in two separate lines to complete this challenge.

The code stub in the editor already creates the main function and Solution class. All you have to do is copy-paste the following lines inside main function.

```
System.out.println("Hello World.");  
System.out.println("Hello Java.");
```

Sample Output

```
Hello World.  
Hello Java.
```
